

Fall 2015

Impervious Laminate Signs

The Innovation Issue

If it's innovative or leading edge, we've got it!

Compelling New Sign Tech

If you're looking for the latest technology in signage Speedpro Clients are in for a treat. A new custom high pressure laminate sign and graphic option that will make a lasting impression. A few awesome features of this new product are:

DURABLE

Perfect for extreme interior and exterior environments (even Canadian winters!). Fade, scratch and graffiti resistance, impervious to moisture and thermally stable.

DIVERSITY

Infinite sizes and shapes are possible which means we can get really creative! Three surface finishes (lustrous, smooth, optical clarity) available and double sided image capability.

ECO FRIENDLY

Post consumer recycled content core, water based inks, AND a reduced

carbon footprint in manufacturing all add to the environmentally conscious characteristics of this product.

How / where can you use this new signage product? Pretty much anywhere. Here are some examples:

- Parks and Open Spaces
- Experimental Environments
- Wayfinding – Directional, Interpretative, Informational
- Interior & Exterior Branding Business Signage and Elements
- Donor Recognition Programs
- Custom Furniture and Fixture Surfaces
- Interior Wall Panels or Exterior Building Cladding
- Merchandising and Showroom Displays
- Kiosks and Trade Show Booths

Wondering if this new custom high pressure laminate product would work for your next project? Give us a call and we'll explore the options.

Flat is not where it's at! Add some Texture.

Speedpro is now an official dealer of Texture Plus panels and this opens up a world of possibility for signs, displays and residential building projects.

With more than 850 designs the potential applications are endless. Plus they're lightweight, durable, realistic looking, easy to install, economical and they have a 25 year warranty! Really? It doesn't get much better than that.

Commercial Applications:

Use the panels in commercial projects like your store or office interior or exterior. Create eye catching product displays or use unique panels as a cool, impactful background for your company sign. Texture Plus panels are also a unique product to use for a tradeshow display. You'll have them looking twice with a paneling that helps create a distinctive brand impact.

Residential Applications:

Texture Plus panels add a splash of pizzazz to residential projects. Finish your cozy fireplace with warm honey colored brick, add some style without breaking the bank to finish your new outdoor kitchen, or create a high-end look in your front entrance with a classy slate texture.

Texture Plus panels are so versatile and easy to install you can start and finish a project in no time. The cost savings of a stone, wood or metal finish panel vs using the actual product is jaw dropping.

This a new offering from Speedpro and we look forward to helping you find just the right texture for your next project.

Dazzling in 3D

It's everywhere! You can't read a newspaper or watch TV and not see something related to 3D printing, and although not entirely a 'new' concept (it was developed in 1984 and patented in 1986), 3D printing is making headlines around the world. Speedpro is not sitting on the sidelines. We're thrilled to offer 3D plastic printing to clients across Canada.

So what is it? Essentially its materials other than ink, dispensed from printer-type nozzles onto moving platforms. The layers of patterns result in a 3D object. The design of the object is controlled by a computer with 3D graphics software.

Why use it? People, including our clients are using it for a variety of purposes:

- **Real Estate** – 3D Model Homes.

- **Retail** – Phone cases, lamp shades, footwear and other products like the plastic sandals shown in the photo below.
- **Prototyping** – Before investing in full blown manufacturing of a new product, a 3D printed model allows you to see what it would be like before you go into mass production.
- **Custom/Unique Items** – From jewellery to custom figurines, you can print out products and offer them for sale, usually at a premium, because they are unique.

The applications for 3D printing are just starting to be realized and we can't wait to print your next 3D project. For more information or to place your order give us a call.

It All Starts with an Idea
